

ABOUT US

How it all began?

Innovation is the cornerstone of Machint and we go out of the ordinary to innovate the traditional way of doing business. We are passionate about helping organizations reimagine their business and thrive with our groundbreaking intelligent automation technology. We deliver cutting-edge automation solutions and proficient consultant services for organizations to begin their digital transformation journey.

Our deep domain expertise and proven capabilities in RPA, BPM, Data Science, Digital Engineering, AI/ML, QA, Business Consulting have enabled many global organizations in successfully realizing their digital transformation goals and scale at speed.

The seeds for Machint Solutions were sown back when Rajesh Sanakkayala, the founder of Machint, partnered with a small technology house that focused on resource-based consulting services to help them grow their business. Rajesh always had a burning desire to build a brand-new niche technology expertise. Everything fell into place once the partners realized the immense market demand for process management and automation solutions. This perfectly aligned with Rajesh's vision and entrepreneurial dreams. Thus began the glorious journey of Machint Solutions as a technology services provider in Hyderabad, India in 2018.

VISION:

We aim to revolutionize the way the world is doing business by helping organizations unlock the true power of digital transformation with our futuristic intelligent automation solutions.

MISSION:

We are on a mission to:

- a) Build an ecosystem to encourage innovation and develop scalable solutions to empower businesses.
- b) Make technology an integral and invaluable virtue for businesses through our CoE approach.
